

society vs country

- no boundaries
- changes identity
- no written constitution

↳ violations are reprimanded by the society

- * social laws are not written
- ↳ social backlash due to violation

* society → macro to micro level

↳ changes with time

↳ family → starts socialization

→ has a boundary

→ people residing within have an identity

→ has written constitution to rule the people

↳ law

↳ violation is a crime

↳ punished according to law

↳ people violating these are known as criminals.

Freud

ID → humans by birth have animal-like qualities

Ego ||||| super ego ⑥ qualities

cross all 6

Achieved status

* injustice started after industrial revolution specifically in case of environment.

environment → everything around us

↳ ② types

↳ natural ————— living

↳ artificial/man-made ————— non-living

↳ material environment

↳ non-material environment

↳ Ethics

↳ cannot be seen, touched

↳ written form may be available

1800 ————— 1 billion
130

1930 ————— 2 billion
30

1960 ————— 3 billion
15

1975 ————— 4 billion
13

1988 ————— 5 billion
12

2000 ————— 6 billion
11

2011 ————— 7 billion
10

2021 ————— 8 billion

Dhaka → 35M+

BD → population in 1971
↓
70M

2nd in terms of population

① → Jakarta

more humans → need → source: nature
↳ food

food
clothing
housing

Environment

- * define environment
- * types of environment
- * green house
- * green house effect
- * green house gases
- * global warming

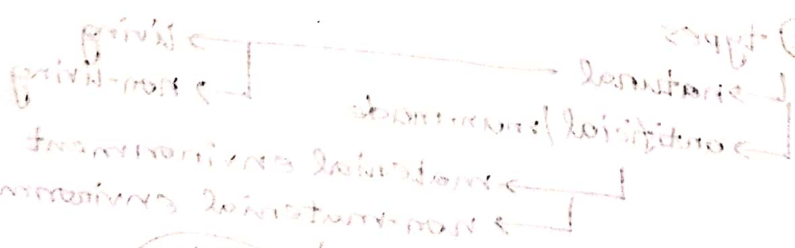

man-made

natural

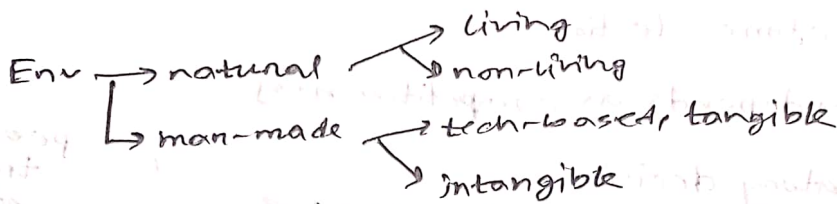

earth

pollution started after 1960s.

before that natural healing countered the existing minimal pollution.

handwritten notes at the bottom of the page, including 'government intervention' and 'legislation'.

Greenhouse $\rightarrow$ org. Earth
imbalance $\rightarrow$ pollution

↳ created by humans e.g. deforestation

post industrial
revolution } rapid increase in population
 ↳ need for food

↳ need for food, clothing, - ↑↑

pollution

- water
- land
- sound/noise
- solid waste

↳ throw-away society recycle reuse

-solid waste → plastic containers, wrappings

use & throw society $\Rightarrow$ solid waste pollution $\uparrow\uparrow$

created by humans

solid waste management → not as developed in our society

environmental injustice ↗

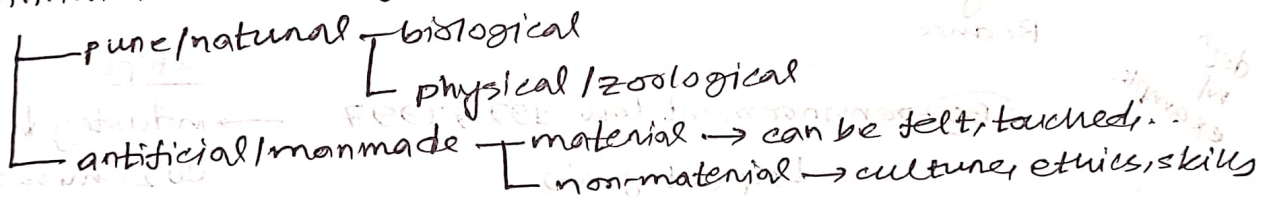

human ecology $\rightarrow$ O_2 & CO_2 balance

↳ create imbalance → injustice

social classes → privileged vs under-privileged

- ① Define environment, types of environment with examples.
- ② Define green house, natural green house, green house gases, green house effect.
- ③ Define global warming, consequences of global warming.
- ④ Define pollution, types of pollution with examples.
- ⑤ Define solid waste, throw away society.
- ⑥ Define 4 R's with examples.
- ⑦ Define 4 industries with examples.
- ⑧ Save the environment or green environment or green technology

① environment → everything that surrounds...

② winter-heavy countries → plants cannot survive.
 glass-made houses → trap heat → env for plants to survive
 ↳ manmade green house

natural → earth
 greenhouse gases → CH_4 , CFC, FFC, ...
 ↳ small amount → balanced → human ecology system
imbalance → pollution → due to human activity

④ minimum {
 soil
 land
 water
 air
 noise/sound

food
 visual → posters...
 lead

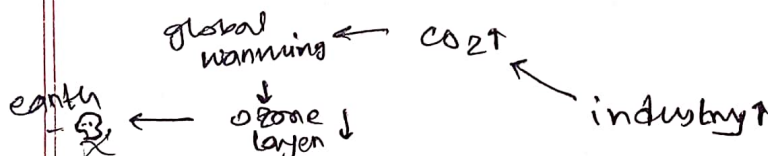

light → lights at night

solid → modern throw away society

↳ use & throw
 e.g. ball pens

prev: lifelong products were manufactured.

↳ mostly one-time products and manufacture

humans need to be adaptive to survive.

throw away society → solid waste ↑

↳ industries, hospitals, clinics.

↳ infects, affects the underprivileged society mostly.

↳ injustice

ethics

solid waste management.

(4R)

pollution

reducing

industry → minimum reqs

before 1760 -
world → agriculture based

after
↳ industries began to form
↳ injustice

need to conduct survey beforehand

⑤ { land
labour
capital
raw materials
management } → 2 diff manpower

status
ranking
economic status
↓
dignity

relative position in the society,
↳ respect
↳ abstract / vague term

diff

⑤ prod. cost + ④ selling cost

indices
↳ terms used to calculate & compare.

agriculture-based society → status → ascribed status → by born
farmer → generational
noble → "

industrial revolution → new type of status → achieved status → earned
status → discrimination → ... → break down of joint families..

top 22 industries green category
↳ ③ info → w/ the application for establishment of industries.

environment law

↳ NOC from local authority → local authority survey needed

orange category A → candy, cattle farm, poultry farm, ...
↳ more..

defo
↳ info
2 examples

orange B → high commercial building → air, water, land, sound
noise pollution → all

⑥ need → industries needed for development
↳ need protection from pollution
↳ for both existing & new ones.

5 lines

↳ after 1991
↳ indiscriminate establishment

⑧ save the env.

⑨ law → implement → obstructed by industrialists, beneficiaries, consumers.

↳ COST ↑↑

② awareness/ethics should to be developed
green city/tech building..

use of AC/heater/vehicle..

new safer tech..

solar power → buildings must use this..

Smart Bangladesh, Smart Citizen

before industrial revolution → agriculture based society

1760s

↳ no noteworthy transport

→ people always lived in the same place.

① primitive communism ^{society} system → Karl Marx → 5 stages

↳ no discrimination, equal rights

② slave based society

↳ humans sold & bought as products

③ feudalistic society → agriculture-based

④ capitalistic society → currently all over the world.

⑤ socialistic society → Soviet union, Russia, China
Indian subcontinent → till 90s.

↳ modern communistic society → Marx's expectation

last stage

↳ but capitalistic & socialistic both co-existed.

↳ no longer exists.

Thesis — Anti thesis

Synthesis → system

↳ Thesis turns into Anti thesis again emerges

① primitive → thesis, no antithesis → equal rights

② slave based → antithesis emerged → slaves vs lords

③ feudalistic → ~~reformist~~ — land lord thesis

↳ Anti
↳ not like slaves
↳ had individualism

④ capitalistic → selfish nature (me) → capitalist class working class

↳ conflict

↳ modern communism emerges

expectation

based on
thesis,
anti-thesis,
synthesis

1760s → industrial revolution → ^{1st} capitalistic society → ^{emerging}

4th industrial revolution → current

1760 (1st) → steam engine

1860 (2nd) → electricity, road -

1920 (3rd) → radio, TV -

current (4th) → digitizing everything
2020s
